JOB OPENING · WE ARE HIRING

MQTec GmbH

Azure Cloud Consultant (m/f/d)

You advise our customers on their way to Azure and help build what you recommend.

Darmstadt | Hybrid | Full-time | Immediate start

You enjoy explaining to a management team what Azure means for their business, and then set up the landing zone yourself? Read on.

MQTec is a managed service provider based in Darmstadt, Germany. We look after mid-sized companies, including customers in the regulated financial sector, in Azure, in Microsoft 365 and on our own hosting platform in Germany. You work close to the customer: you know the people you plan for and stay with a project from the first workshop to the handover into operations. The team is small. Decisions are made quickly, and your work stays visible.

What you will do

- You assess the customer's current setup and turn it into a target picture, an architecture and a migration plan for Azure
- You run workshops on cloud strategy, landing zones, governance and cost
- You help build landing zones and workloads yourself: networking, identity, compute, storage and Azure Policy
- You plan and support migrations from the data center to Azure, including hybrid setups with Azure Arc and Azure Local
- You make sure security and compliance requirements are part of the architecture from the start
- You describe what you build as code with Terraform and PowerShell and hand it over to our operations team with documentation
- You keep an eye on cost and show customers where they can save
- You support proposals, effort estimates and proofs of concept and help expand our Azure offering

What you bring

- You have several years of project experience with Azure and have designed and implemented environments yourself
- You are confident in networking, identity, compute, storage and Azure Policy and know the Cloud Adoption Framework from practice
- You know Windows Server and Active Directory well, because most migrations start there
- You use Terraform or Bicep and PowerShell routinely
- You plan hardening, backup and recovery in from the beginning

- You run workshops, write clear concepts and stand behind your solution in front of specialist teams and management
- You estimate effort realistically and keep a project within the agreed scope
- You are fluent in German and English, and on-site appointments with customers are part of the job for you

Nice to have

- Microsoft certifications such as AZ-104, AZ-305 or AZ-700
- Experience in regulated environments, for example with DORA requirements
- Hands-on cost optimization (FinOps)
- Experience with containers and AKS
- Some exposure to Proxmox or FortiGate

What you get

You work independently, help make decisions and get room for your own ideas. On top of that:

Wellpass
company fitness membership in addition to your salary

32 days of leave
based on a five-day week

Hybrid work
office and home office, flexible hours

Company bike
leasing via JobRad

Deutschlandticket
nationwide local transport, private use included

A great office
Hilpertstraße 20 in Darmstadt

Structured onboarding
a dedicated contact from day one

Certifications
training and exams are part of the job

Current technology
in projects and on your desk

Short paths
few levels, quick decisions

Team and events
people know each other and help each other

How to apply

Send us your CV or a link to your profile. Tell us when you could start and what salary you have in mind. You do not need a cover letter. We are happy to answer questions by phone beforehand.
