JOB OPENING · WE ARE HIRING

MQTec GmbH

Microsoft 365 Consultant (m/f/d)

You introduce Microsoft 365 at our customers and make sure it is set up securely.

Darmstadt | Hybrid | Full-time | Immediate start

Microsoft 365 is switched on quickly and rarely set up properly. If you know how to do it right and enjoy explaining it to customers, read on.

MQTec is a managed service provider based in Darmstadt, Germany. We look after mid-sized companies, including customers in the regulated financial sector, in Azure, in Microsoft 365 and on our own hosting platform in Germany. You work close to the customer: you know the people you plan for and stay with a project from the first workshop to the handover into operations. The team is small. Decisions are made quickly, and your work stays visible.

What you will do

- You advise customers on Microsoft 365: assess the current setup, design the target picture, plan the rollout or migration
- You set up tenants and secure them: Entra ID, Conditional Access, MFA, roles and permissions
- You migrate mailboxes and data to Exchange Online, SharePoint, OneDrive and Teams, including from Google Workspace or between tenants
- You build device management with Intune for Windows, macOS and mobile devices
- You implement protection and compliance: Microsoft Defender, plus Purview with sensitivity labels, DLP and retention
- You prepare customers for Copilot: permissions, data storage and governance
- You advise on licensing and make sure customers only pay for what they use
- You train administrators and users and hand your work over to our operations team with documentation

What you bring

- You have several years of project experience with Microsoft 365 and have set up and migrated tenants yourself
- You know Entra ID in detail: Conditional Access, MFA and hybrid identities with Entra Connect
- You are confident in Exchange Online, Teams, SharePoint Online and OneDrive
- You have hands-on experience with Intune: devices, policies and app deployment
- You know the Defender and Purview features and align them with what the customer needs
- You use PowerShell and Microsoft Graph for reporting and recurring tasks

- You run workshops, write clear concepts and stand behind your solution in front of specialist teams and management
- You are fluent in German and English, and on-site appointments with customers are part of the job for you

Nice to have

- Microsoft certifications such as MS-102, MD-102 or SC-300
- Experience in regulated environments, for example with DORA requirements
- Managing Apple devices in companies
- Knowledge of Teams telephony
- Basic Azure knowledge, especially networking and identity

What you get

You work independently, help make decisions and get room for your own ideas. On top of that:

Wellpass
company fitness membership in addition to your salary

32 days of leave
based on a five-day week

Hybrid work
office and home office, flexible hours

Company bike
leasing via JobRad

Deutschlandticket
nationwide local transport, private use included

A great office
Hilpertstraße 20 in Darmstadt

Structured onboarding
a dedicated contact from day one

Certifications
training and exams are part of the job

Current technology
in projects and on your desk

Short paths
few levels, quick decisions

Team and events
people know each other and help each other

How to apply

Send us your CV or a link to your profile. Tell us when you could start and what salary you have in mind. You do not need a cover letter. We are happy to answer questions by phone beforehand.
